

# NURSING (NUR)

---

## **NUR-101 Introduction to Science of Caring (2 credits)**

This course offers an overview of nursing and the role of the professional nurse as a caring provider of holistic care, patient safety advocate, coordinator of care, member of the health care team, and member of the profession. Topics include an introduction to nursing knowledge (nurseology), clinical judgment, nursing history, nursing theory, and professional values and standards.

## **NUR-110 Population Based Nursing (3 credits)**

The history, scope of practice and role of nursing as it relates to preventive health practices and health promotion are introduced. A broad population focused perspective on factors that affect the health of the public, including systems thinking, health and safety, and cultural sensitivity concepts is presented. Epidemiologic factors, health surveillance, and the health-illness continuum are explored. Healthy People National Goals and Objectives are introduced through a service learning component. Prerequisite: Nursing Major

Course Types: Cultural Competence

## **NUR-115 Nursing Success Seminar I (2 credits)**

This course designed to help first-time freshmen nursing students learn and improve skills essential to academic success. Students identify their educational goals, personal strengths, and areas for development; become familiar with college resources and services; and explore strategies for academic success such as time management, and study skills. Prerequisite: Nursing Major

## **NUR-116 Nursing Success Seminar II (1 credits)**

A 10-week course designed to expose freshmen nursing students to the skills and attributes needed to become a professional nurse. The course will focus on development of critical thinking skills, professionalism, effective communication skills, and ethical considerations in practice, team building, and self-management. Prerequisite: Nursing Major

## **NUR-201 Clinical Judgment for Nursing Practice (2 credits)**

This course introduces clinical judgment using the NCBSN Clinical Judgment Model. There is an emphasis on the application of this model in the care planning process, and provides the foundation for the clinical judgment process applied throughout all nursing courses.

Prerequisite(s): Take NUR-101

## **NUR-210 Health Assessment Across the Lifespan (4 credits)**

This course focuses on the role of the professional nurse as a direct care provider in terms of assessing the health status of individuals from socially and culturally diverse backgrounds across the life span. Strong emphasis is placed on the application of communication techniques to establish a nurse-patient relationship and to elicit a health history. The course also focuses on the use of physical assessment techniques, namely inspection, palpation, percussion, and auscultation. Assessment findings will be analyzed to identify the health needs of individuals in relation to health promotion. Students are introduced to the role of the nurse as consumer of research as it applies to health assessment and health promotion. Strategies to facilitate patient empowerment and self-responsibility are presented. The outcomes of this course will reflect not only students' level of skill in performing health assessments but also in communicating assessment findings using professional documentation standards.

Course Types: Cultural Competence

Prerequisite(s): Take BIO-107 BIO-107L BIO-108 BIO-108L PSY-203; Take (CHE-114 CHE-114L) or (CHE-101 CHE-101L CHE-112) or (CHE-101 CHE-101L BIO-303) or (CHE-111 CHE-112 CHE-113L)

Corequisite(s): Take BIO-208 BIO-208L NUR-110 NUR-280; Take NUR-210L

## **NUR-210L Health Assessment Lab (0 credits)**

On-campus laboratory course to accompany NUR-210. Corequisite: NUR-210L.

Corequisite(s): Take NUR-210

## **NUR-215 Women's Health Issues (3 credits)**

This course focuses on health issues unique to women. Current approaches and research are discussed in the light of emotional and sociological needs of this group. The responsibility of women for self-examination and monitoring of their health and the impact of being a woman in today's world are stressed. The role of the professional nurse as a health care provider, advocate and health teacher in collaboration with other members of the health care team (social workers, teachers, etc.) will be explored. Open to all students.

## **NUR-216 Transcultural Nursing (3 credits)**

This course will focus on developing cultural awareness in individuals who practice in the health-related professions. Ethnocentrism, ethnic practices, cultural diversity, workplace cultural behavior and intercultural problems as they relate to health care are presented.

Course Types: Cultural Competence; Writing Intensive

**NUR-240 Fundamentals of Nursing (4 credits)**

This course focuses on the role of the professional nurse as the direct care provider utilizing the nursing process when planning care for individuals across the lifespan. Strong emphasis is placed on the understanding of the theory required to safely perform technical nursing skills. Students will analyze patient scenarios to identify the nursing skills necessary to provide quality nursing care. Focus is on the patient-centered approach, which considers physiological, developmental, cultural, and spiritual needs, and preferences of the patient.

Course Types: Teamwork

Prerequisite(s): Take (CHE-114 CHE-114L) or (CHE-101 CHE-101L CHE-112 or (CHE-101 CHE-101L BIO-303) or (CHE-111 CHE-112 CHE-113L); Take BIO-107 BIO-107L BIO-108 BIO-108L PSY-203

Corequisite(s): Take NUR-240L; Take BIO-208 BIO-208L NUR-110 NUR-210 NUR-210L

**NUR-240L Fundamentals Lab (0 credits)**

On-campus laboratory course to accompany NUR-210 Corequisite: NUR-240

Corequisite(s): Take NUR-240

**NUR-250 Health Assessment (3 credits)**

This course is designed for the RN student and focuses on the role of the professional nurse as a direct care provider in terms of assessing the health status of individuals across the life span. Strong emphasis is placed on the refinement of interviewing skills and physical assessment techniques for the purpose of eliciting a detailed health history and complete physical examination. Students will focus on analyzing assessment findings in order to identify the health needs and problems of individuals from socially and culturally diverse backgrounds. Opportunities to practice health assessment and documentation skills will be provided in an on-campus laboratory setting. Open to nursing students only.

**NUR-260 Nursing Care of the Older Adult Chronic Conditions (5 credits)**

This course introduces the student to major concepts related to the care of the older adult patient with chronic illness in a variety of settings. The course will explore theories and concepts related to the aging process in health and illness based upon Maslow's Hierarchy of Needs. Students will utilize evidence-based practice in the prevention of complications related to chronic disease. Students will employ a wide variety of leading health indicators via assessment tools, evidence-based protocols and standards. Patient safety and prevention of complications related to chronicity will be emphasized. Students will be provided clinical experiences in a variety of settings. Students will develop the ability to work collaboratively with other healthcare disciplines in providing safe, competent and ethical patient care.

Course Types: Teamwork

Prerequisite(s): Take BIO-208 BIO-208L NUR-110 NUR-210 NUR-210L NUR-240 NUR-240L

Corequisite(s): Take NUR-280 NUR-285

**NUR-260L Nursing Care Lab--Older Adult Chronic Conditions (0 credits)**

Clinical laboratory course to accompany NUR-260. Corequisite: NUR-260.

Corequisite(s): Take NUR-260

**NUR-275 Nursing Health Assessment (3 credits)**

This course focuses on the role of the professional nurse in the holistic assessment of the health status of individuals from diverse backgrounds across the life span. An emphasis is placed on communication techniques needed to support a nurse-patient relationship.

Prerequisite(s): Take NUR-101

Corequisite(s): Take NUR-201

**NUR-275L Nursing Health Assessment Clinical Practice Class (0 credits)**

This course focuses on the role of the professional nurse in the holistic assessment of the health status of individuals from diverse backgrounds across the life span. An emphasis is placed on communication techniques needed to support a nurse-patient relationship.

Corequisite(s): Take NUR-275

**NUR-280 Pathophysiology for Nursing (3 credits)**

This course provides an in-depth study of abnormal physiology with emphasis on nursing implications related to pathologic processes affecting patients across the lifespan. The major body systems and related pathology are explored. Focus is on etiology, manifestation, diagnosis, and treatment of disease from a patient-centered nursing perspective.

Course Types: Critical Analysis

Prerequisite(s): Take BIO-107 BIO-107L BIO-108 BIO-108L BIO-208 BIO-208L NUR-240 NUR-240L; Take (CHE-114 CHE-114L) or (CHE-101 CHE-101L CHE-112 or (CHE-101 CHE-101L BIO-303) or (CHE-111 CHE-112 CHE-113L)

Corequisite(s): Take NUR-285

**NUR-285 Pharmacology for Nursing Practice (3 credits)**

This course focuses on the role of the nurse as a member of the interdisciplinary healthcare team responsible for the management of health problems using pharmacologic and nonpharmacologic interventions. Major classifications of pharmacologic agents are presented. Emphasis is on patient response across the lifespan, with the goal of preparing students to administer these agents in a knowledgeable, safe, and therapeutic manner.

Course Types: Critical Analysis

Prerequisite(s): Take BIO-208 BIO-208L NUR-240 NUR-240L

Corequisite(s): Take NUR-280

**NUR-300 Nursing Theory: a Look Back At History At History and Forward Through Practice (3 credits)**

This course is designed for the nursing student, focus is on the cognitive and professional skills of nursing theory. The cognitive skills emphasized include critical thinking, research utilization, and theory utilization in professional nursing practice. The history of nursing and nursing theorists will be explored through lecture, discussion, discussion boards, and projects. This course is open to all nursing students at the undergraduate level.

Course Types: Lifelong Learning

**NUR-315 Professional Nursing 1 (6 credits)**

This course provides the foundation for professional nursing practice. Students are provided opportunities to apply clinical judgement skills to explore the professional values and role of professional nurses. The student will apply the NCBSN Clinical Judgment Model to deliver safe, evidence based, holistic nursing care.

**NUR-315L Professional Nursing 1 (0 credits)**

This course provides the foundation for professional nursing practice. Students are provided opportunities to apply clinical judgement skills to explore the professional values and role of professional nurses. The student will apply the NCBSN Clinical Judgment Model to deliver safe, evidence-based, holistic nursing care.

Corequisite(s): Take NUR-315

**NUR-320 Blended Nursing Pathophysiology and Pharmacology for Nursing Practice 1 (3 credits)**

This course introduces the essential principles of pathophysiology and pharmacology needed to identify, anticipate, and address complications associated with disease processes. Medications are introduced as they relate to basic pathophysiology seen in each body system. Emphasis is placed on the nursing implications and patient education required. Students explore the role and responsibility of registered nurse in administering and evaluating medication.

**NUR-325 Blended Nursing Pathophysiology and Pharmacology for Nursing Practice II (3 credits)**

This course is a continuation of Blended Nursing Pathophysiology and Pharmacology for Nursing Practice I.

Prerequisite(s): Take NUR-320

**NUR-340 Caring for the Community (2 credits)**

This course focuses on holistic community-based nursing practice and population-based care needs of diverse individuals. Emphasis is placed on identifying determinants of health, vulnerable populations, levels of prevention, community assessment, health promotion and disease prevention utilization in community settings

**NUR-350 Professional Nursing 2 (5 credits)**

This course provides conceptual, theoretical, and clinical foundation using a caring model to provide safe, evidenced based, holistic care for adult patients in diverse clinical settings. This course focuses on health maintenance and restoration, and the provision of comfort. Intermediate concepts and clinical practice skills for the nurse's professional role in nursing situations are emphasized.

**NUR-350L Professional Nursing 2 (0 credits)**

This course provides conceptual, theoretical, and clinical foundation using a caring model to provide safe, evidenced based, holistic care for adult patients in diverse clinical settings. This course focuses on health maintenance and restoration, and the provision of comfort. Intermediate concepts and clinical practice skills for the nurse's professional role in nursing situations are emphasized.

Corequisite(s): Take NUR-350

**NUR-360 Nursing Care of the Adult Acute and Chronic Health Conditions (7 credits)**

This course builds on concepts learned in previous courses and emphasizes care of the adult with acute medical/surgical health conditions utilizing Maslow's Hierarchy of needs. Students will provide quality care for acute care patients from admission through discharge with emphasis on patient education and health promotion. Students will practice in a variety of clinical settings and laboratory simulations. Students will enhance their ability to work collaboratively with other healthcare disciplines in providing safe, competent and ethical patient care.

Course Types: Problem-Solving

Prerequisite(s): Take NUR-260 NUR-260L NUR-285

Corequisite(s): Take NUR-360L NUR-380

**NUR-360L Nursing Care Lab--Adult Acute and Chronic Health Conditions (0 credits)**

Clinical laboratory course to accompany NUR-360. Corequisite: NUR-360.

Corequisite(s): Take NUR-360

**NUR-380 Evidence Based Practice (3 credits)**

This course is an introduction to the nursing role related to evidence-based practice. Content includes how evidence-based practice contributes to the development of nursing knowledge, improves nursing practice, supports design of nursing systems, and enhances education and professional accountability. The historical evolution of nursing research and evidence-based practice is examined and current issues are analyzed. Ethical considerations and rights of human subjects are explored. As a consumer of evidence-based practice, the student develops the ability to integrate best current evidence with clinical expertise and patient/family preferences and values for delivery of optimal health care.

Course Types: Information Literacy

Prerequisite(s): Take NUR-210 NUR-210L NUR-240 NUR-240L MAT-123

**NUR-389 Special Topics in Nursing (3.00000 credits)**

This course provides students an opportunity to study a selected topic in nursing with a small group of students; topics may evolve from either student or faculty interest Offerings include a one credit summer clinical experience available to eligible students between their junior and senior years; this option is subject to availability of placements in affiliating health care facilities.

**NUR-395 Maternal Newborn Nursing Care (2 credits)**

This course focuses on the role of the professional nurse as a provider, advocate, and collaborative partner in the promotion, maintenance, and restoration of health for maternal and newborn clients. This course utilizes evidence-based research, and application of nursing knowledge with maternal-newborn nursing and women's health.

**NUR-405 Essentials of Nursing Research (3 credits)**

This writing-intensive course introduces quantitative and qualitative research methodologies and promotes the use of research findings as a basis for improving clinical practice. Emphasis is placed on the critical review of research studies and their application to evidence based clinical practice.

**NUR-410 Professional Nursing 3 (6 credits)**

This course provides conceptual, theoretical, and clinical foundation using a caring model to provide safe, evidenced based, holistic nursing care to adults with acute health problems. Concepts of management of acute illness, promotion of health and function, provision of comfort, clinical judgment and error reduction, and quality improvement are examined. Advanced concepts and skills for the nurse's professional role are emphasized.

Corequisite(s): Take NUR-410L

**NUR-410L Professional Nursing 3 (0 credits)**

This course provides conceptual, theoretical, and clinical foundation using a caring model to provide safe, evidenced based, holistic nursing care to adults with acute health problems. Concepts of management of acute illness, promotion of health and function, provision of comfort, clinical judgment and error reduction, and quality improvement are examined. Advanced concepts and skills for the nurse's professional role are emphasized.

Corequisite(s): Take NUR-410

**NUR-415 Nursing Care of Children (2 credits)**

This course focuses on the role of the professional nurse as a provider, advocate, and collaborative partner in the promotion, maintenance, and restoration of health for pediatric patients and families. This course utilizes evidence-based research, and application of nursing knowledge from infancy through late adolescence.

**NUR-425 Caring for Mental Health (3 credits)**

The focus of this course is the role of the professional generalist nurse as a provider, advocate, and collaborative partner in the promotion, maintenance, and restoration of holistic mental health for developmentally, culturally, and spiritually diverse adults and families. Evidence-based practices, clinical judgment, interdisciplinary communication, and therapeutic use of self are emphasized as essential skills to promote safe and effective patient-centered outcomes within the context of a trauma-sensitive system of care.

Corequisite(s): Take NUR-425L

**NUR-425L Caring for Mental Health (0 credits)**

The focus of this course is the role of the professional generalist nurse as a provider, advocate, and collaborative partner in the promotion, maintenance, and restoration of holistic mental health for developmentally, culturally, and spiritually diverse adults and families. Evidence-based practices, clinical judgment, interdisciplinary communication, and therapeutic use of self are emphasized as essential skills to promote safe and effective patient-centered outcomes within the context of a trauma-sensitive system of care.

Corequisite(s): Take NUR-425

**NUR-442 Professional Issues (3 credits)**

This course focuses on the professionalization process as it applies to the associate degree or diploma registered nurse transitioning to the level of baccalaureate prepared registered nurse. Scope and standards of practice for advanced entry level nursing education and practice are analyzed. Attention is given to historical, socio-political and economics trends influencing nursing education and practice; legal and ethical issues; and the relationship of theory to research in guiding nursing practice. The ability to formulate and express ideas through professional writing is emphasized.

Course Types: Writing Intensive

**NUR-443 Clinical Foundations (3 credits)**

This course will integrate principles of pathophysiology, physical assessment, and pharmacology as a foundation to support the role of the bachelor's prepared nurse in clinical practice. Focus will be on the development of knowledge of human pathophysiological functions and response to selected disease processes and the integration of this knowledge into evidenced-based nursing practice. The integration of health assessment skills and pharmacological interventions essential for nursing practice will also be included.

**NUR-455 Professional Nursing 4 (6 credits)**

This course provides conceptual, theoretical, and clinical foundation using a caring model to provide safe, evidenced based, holistic nursing care to adults with acute /complex health problems. Concepts of management of acute /complex illness, injury, promotion of health and function, provision of comfort, clinical judgment and error reduction, and quality improvement are examined. Advanced concepts and skills for the nurse's professional role are emphasized.

Corequisite(s): Take NUR-455L

**NUR-455L Professional Nursing 4 (0 credits)**

This course provides conceptual, theoretical, and clinical foundation using a caring model to provide safe, evidenced based, holistic nursing care to adults with acute /complex health problems. Concepts of management of acute /complex illness, injury, promotion of health and function, provision of comfort, clinical judgment and error reduction, and quality improvement are examined. Advanced concepts and skills for the nurse's professional role are emphasized.

Corequisite(s): Take NUR-455

**NUR-461 Community & Population Based Nursing (3 credits)**

This course provides a broad population focused perspective on factors that affect the health of the public, including systems thinking, health & safety, and cultural sensitivity concepts. Epidemiologic factors, health surveillance, and the health-illness continuum are explored. Healthy People National Goals and Objectives are introduced through community assessment. Patient education and case management of health risks are emphasized. This is a clinical course involving 60 hours of clinical with a preceptor throughout the semester at a location selected by student and faculty collaboratively.

Corequisite(s): Take NUR-442

**NUR-462 Vulnerable Populations (3 credits)**

This course provides an overview of healthcare issues and challenges faced by vulnerable populations, individuals are viewed in the context of family, social and healthcare systems. The influences of factors such as healthcare disparities, stigma, and culture are examined with regard to patient outcomes. Consistent with the value of holism, the role of spirituality is integrated into physical and behavioral health and illness in keeping with the nursing value of holism.

Corequisite(s): Take NUR-442

**NUR-470 Concepts in Community and Mental Health Nursing Care (6 credits)**

This course focuses on community and population-based care and mental health needs of developmentally, culturally, and spiritually diverse individuals, families, and groups. Emphasis is on utilization of critical thinking, nursing interventions, effective communication, and patient education within mental health and community health settings. Physical and behavioral adaptation is emphasized in the context of a community/mental health continuum and a social systems framework.

Prerequisite(s): Take NUR-360 NUR-360L NUR-380

Corequisite(s): Take NUR-470L

**NUR-470L Nursing Care Lab--Community and Mental Health (0 credits)**

Clinical laboratory course to accompany NUR-470. Corequisite: NUR-470.

Corequisite(s): Take NUR-470

**NUR-471 Nursing Care of Childbearing and Childrearing Families (6 credits)**

The focus of this course is the role of the professional nurse as a direct care provider, advocate, and collaborative partner in the promotion, maintenance, and restoration of health for childbearing and childrearing families. Learning activities emphasize identification of health-related needs and planning, implementation and evaluation of evidence-based, patient centered care. The nurse's role as a member of the interdisciplinary health care team in a variety of settings is explored. Utilization of informatics and recognition of system effectiveness are incorporated in order to facilitate safe, quality care and optimum health outcomes.

Prerequisite(s): Take NUR-360 NUR-360L NUR-380

Corequisite(s): Take NUR-471L

**NUR-471L Nursing Care Lab--Childbearing and Childrearing Families (0 credits)**

Clinical laboratory course to accompany NUR-471 Corequisite: NUR-471.

Corequisite(s): Take NUR-471

**NUR-475 Nursing Leadership from Bedside and Beyond (3 credits)**

This course explores organizational and systems leadership, quality improvement, and safety measures critical to implementing high-quality nursing care. Leadership theory and skills exploring delegation, conflict resolution, ethical decision-making, working relationships, and leadership are emphasized. Interprofessional collaboration based on professional nursing standards are explored within the broad context of cultural, economic, organizational, and political backdrops.

**NUR-480 Nursing Care of Patients With Complex Health Needs (6 credits)**

This course focuses on concepts related to the knowledge, skills and professional behaviors for the patient requiring complex nursing care. These concepts are built from previous courses and applied to the care of patients experiencing advanced or complicated health alterations. The course integrates evidence-based practice, informatics, interdisciplinary teamwork, safety and patient centered care.

Prerequisite(s): Take NUR-470 NUR-470L NUR-471 NUR-471L NUR-485

Corequisite(s): Take NUR-480L

**NUR-480L Nursing Care Lab--Patients With Complex Health Needs (0 credits)**

Clinical laboratory course to accompany NUR-480 Corequisite: NUR-480.

Corequisite(s): Take NUR-480

**NUR-481 Leadership to Advance Quality and Safety (3 credits)**

This course explores QSEN competencies of teamwork and collaboration, safety, evidence based care, informatics, quality improvement, and patient centered care. Leadership theory and skills exploring delegation, conflict resolution, ethical decision-making, working relationships and leadership are emphasized. Inter professional collaboration based on professional nursing standards is explored within the broad context of teamwork principles. The course contains the capstone assignment for the RN-BSN student. This is a clinical course involving 60 hours of clinical with a preceptor throughout the semester at a location selected by student and faculty collaboratively.

Prerequisite(s): Take NUR-380 NUR-442 and NUR-461.

**NUR-485 Systems Leadership for Quality Care and Patient Safety (3 credits)**

This course explores organizational and systems leadership, quality improvement and safety measures critical to implementing high quality nursing care. Leadership theory and skills exploring delegation, conflict resolution, ethical decision-making, working relationships and leadership are emphasized. Interprofessional collaboration based on professional nursing standards is explored within the broad context of cultural, economic, organizational and political backdrops.

Prerequisite(s): Take (NUR-470 NUR-470L) or (NUR-471 NUR-471L)

**NUR-490 Transition into Practice (3 credits)**

This course prepares students to transition from nursing student to registered nurse. This course is a culmination of prior nursing courses. Students will be utilizing advanced nursing concepts related to the role of the nurse as a member of the profession, provider of patient-centered care, patient advocate, and member of the healthcare team. Emphasis is placed on the utilization of evidence-based practice and informatics to promote safety and quality in healthcare. This course also provides additional instruction to assist students in career planning and development as well as preparing for NCLEX success and licensure.

Corequisite(s): Take NUR-455 NUR-455L

**NUR-560 Introduction to Global Health (3 credits)**

This course is designed to introduce students to critical global health issues and ways to address the challenges faced by health professionals in the field. The course focuses on the following global health topics: communicable and non-communicable disease; maternal/child health; immigrant and refugee health; the relationship between political and cultural processes and health delivery; water/sanitation and global health; health and human rights; and global health partnerships.

**NUR-561 The Impact of Culture on Delivery of Health Care Services (2 credits)**

Cultural competence is an important predictor of patient satisfaction and improved health outcomes. The goal of cultural competence in health care settings is to reduce health disparities and provide optimal care to patients regardless of their race, gender, ethnic background, native languages spoken, and religious or cultural beliefs. Students who may work domestically with refugees and immigrants, or in post-war and under-resourced countries must develop strategies to deliver care, reduce biases and misconceptions when working with groups from different cultures.

Corequisite(s): Take NUR-560

**NUR-562 Care Refugee, Immigrants, Asylum (3 credits)**

This course was developed for students who may be preparing to work with refugees and asylum seekers. On average, close to 60,000 refugees relocate to the United States annually. They come from diverse regions of the world and bring with them health risks and diseases common to all refugee populations as well as some that may be unique to specific populations. This course is designed to help student develop strategies to address basic culturally competent health care needs for displaced people and coordinate care among the government and regulatory agencies concerned with them.

**NUR-563 The Impact of War and Natural Disasters On Health (3 credits)**

This course was developed for students who may work with communities and persons affected by war or natural disasters. Disasters such as volcanic eruptions, floods, wild fires, earthquakes, tsunamis and war are complex humanitarian crises that result in food shortages, lack of clean water, homelessness and a fractured health care infrastructure. These phenomena affect large groups of people with the greatest burden placed on the most vulnerable, the poor, weak and disabled. This course explores the effects that war and natural disasters have on already fragile health care delivery systems especially in under-resourced countries.

Corequisite(s): Take NUR-560

**NUR-564 Global Health Immersion Experience On Health (1 credits)**

Populations seeking health care are becoming more diverse and providers must have experience delivering care to multicultural groups in order to provide comprehensive services. This course was developed to engage students in an immersion experience which focuses on serving the healthcare needs of persons from various cultures and may include working on projects or with groups locally, regionally, nationally or internationally. An immersion experience allows students to apply foundational knowledge acquired during the pre-requisite sequence into a real-world setting. A total of 60 immersion hours are required..

Corequisite(s): Take NUR-560 NUR-561 NUR-562 and NUR-563

**NUR-600 Theory Development in Nursing Research (3 credits)**

This course will present a critique of theories used in nursing practice and in nursing research. Students will develop an understanding of the philosophical and historical trends that shape theories that are applied to the discipline of nursing and impact the delivery of health care services. Emphasis is placed on the process of concept analysis and the application of theory to nursing practice. Prerequisite/Co-requisite: undergraduate statistics course and student must be enrolled in a graduate program or have the permission of the instructor.

**NUR-601 Research Methods in Nursing (3 credits)**

This course will provide the foundational knowledge needed by masters' prepared nurses in order to design and evaluate research methodologies used for investigating clinical problems. The components of research design including settings, sampling frames, instrumentation, subject selection, and validity threats will be presented. Computer programs used for statistical analyses in nursing and health-related research will be reviewed. Emphasis is placed on the masters prepared nurse as a producer and consumer of research. Prerequisite/Co-requisite: undergraduate statistics course and student must be enrolled in a graduate program or have the permission of the instructor.

**NUR-610 Project Seminar Design & Proposal (3 credits)**

Critical discussion of current nursing practice, nursing education or nursing administration challenges or other needs of the profession, as related to gaps representing project opportunities. Students will identify and delineate a project concept, with subsequent development of the project.

Prerequisite(s): Take NUR-600 NUR-601

**NUR-611 APN Role Transit Policy Sem (2 credits)**

This course prepares advanced practice nursing students with the theoretical knowledge required to be successful members of contemporary health care delivery systems. Students will gain a broad perspective of how local, state and federal policies along with regulatory statutes impact their ability to provide patient care. Students will become familiar with legal and ethical aspects of advanced practice delivery, licensure, certification, liability and malpractice, health care funding models and legislative mandates that influence practice.

**NUR-612 Entrepreneurship for Nursing Leaders (1 credits)**

Entrepreneurship is a growing sector in health care. Understanding how to develop and deploy a business plan to be a successful entrepreneur in the health care environment and emerging markets will be explored in this course.

**NUR-613 Nursing Leadership and Communication (3 credits)**

Today's climate demands nursing leaders to be flexible, creative, and able to empower others. Strategies are drawn from both leadership and management theories. Nurses lead and manage nursing care for a variety of populations. Internal and external communication continues to be one of the most important challenges for healthcare leaders. This course will discuss the changed role of a nurse leader, general administration and management, decision-making, entrepreneurship, cost-effective, communication and committed care.

**NUR-614 Financial Management for Nurse Leaders (2 credits)**

Today's healthcare organizations are challenging. Throughout this course the students will be reviewing financial issues, financial problems, and financial methods that exist in various health care settings. The course will review delivery of care, labor relations, personnel management, including budgets; audits and fiscal responsibility.

**NUR-615 Nurse Leadership Practicum (3 credits)**

This course provides the opportunity for the clinical application of theories and principles from classroom learning in the area of nursing leadership. There is a requirement of 180 hours of fieldwork under the supervision of a qualified preceptor and faculty.

Prerequisite(s): Take NUR-613 NUR-614

**NUR-616 Curriculum Development and Evaluation (3 credits)**

This course is an overview of past and present curricular trends and development processes. Principles and techniques of curriculum design, development, implementation, and evaluation in educational programs are explored.

**NUR-617 Teaching Strategies & Instructional Tech (3 credits)**

Synthesis of learning acquired in clinical, field experience, education, and research courses. The art, principles and strategies of teaching in higher education and other healthcare organizations are explored. Emphasis is placed on class, clinical, and other learning experiences and evaluation of students, course outcomes, and program outcomes.

Prerequisite(s): Take NUR-616

**NUR-618 Nurse Educator Role Practicum (3 credits)**

This course involves observation, participation, and practice in teaching. Nursing students and other healthcare students will be placed in appropriate teaching situations. Weekly discussions enable students to synthesize previous learning and discuss teaching strategies, clinical/field evaluation, and problems associated with college/healthcare teaching. The teaching practicum requires 180 hours with a qualified preceptor.

Prerequisite(s): Take NUR-616 NUR-617

**NUR-619 Nurse Educator Capstone (3 credits)**

The Clinical capstone project will focus on the didactic specialty chosen by the student (Adult, Women's health, pediatrics, psych-mental health, or population/community health). Application of education nursing theory, core competencies, and education outcomes are emphasized.

Course Types: Capstone

**NUR-620 Epidemiology for Global Health (3 credits)**

Course Description: Epidemiology is foundational in understanding the spread and prevention of both communicable and non-communicable disease on a global level. This course will give the student a basic understanding of the concepts and applications of epidemiologic processes as they apply to global health and quality management. Through a variety of assignments, the student will be able to use the concepts they learn to evaluate current literature and the impact of epidemiologic data on practice and outcomes.

Course Types: Cultural Competence

**NUR-621 Healthcare Quality and Safety (2 credits)**

Healthcare quality has been shown to be a very powerful tool to assist healthcare organizations to be more effective but also to support the safe delivery of services while improving patient outcomes. This course will focus on the healthcare quality and safety standards applied to both inpatient and outpatient settings across health care organizations. Healthcare quality and safety standards impact patient outcomes and often financial reimbursement.

Corequisite(s): Take NUR-613

**NUR-626 Nursing Informatics (2 credits)**

Health care continues to evolve in an increasingly competitive information market. Nursing Informatics is a combination of information from nursing, concepts from computer sciences, cognitive science, information science, and nursing science. This course focuses on nursing informatics and the foundation of the knowledge model.

**NUR-627 Assessment and Evaluation (2 credits)**

The ultimate goal of nursing education is to prepare the student to think critically, communicate accurately, and prepare the student for life-long learning. This course looks at student assessment, test blue prints, student outcomes, and student evaluations in relation to critical thinking of a student.

Corequisite(s): Take NUR-616

**NUR-629 Project Advisement: Implement and Evaluation (1-3 credits)**

This course provides continuing systematic development of a clinically-based project that addresses a problem important to nursing. The problem may be related to health policy, health education, health administration, community-based initiatives or patient-population problems. During this course, the student will meet with their project director to complete the design, and implement and evaluate his or her project according to School of Nursing guidelines.

Prerequisite(s): NUR-610

**NUR-631 Advanced Health Assessment (3 credits)**

This course is designed for graduate nursing students preparing for the role of a Nurse Practitioner and may be taken by other advanced practice nursing students preparing for direct practice roles such as nurse educators. Students learn how to obtain a complete health history, competently perform a complete physical examination and document critical elements necessary for developing differential diagnoses for persons across the lifespan. Practice/evaluation of skills are provided in on-campus lab (NUR-631L) which is a co-requisite.

Corequisite(s): Take NUR-631L

**NUR-631L Advanced Health Assessment Lab (1 credits)**

This course is designed for graduate nursing students preparing for the role of a Nurse Practitioner and may be taken by other advanced practice nursing students preparing for direct practice roles such as nurse educators. Students learn how to competently perform and document a complete history and physical examination for persons of all ages across the lifespan. Practice and evaluation of health assessment skills will be provided in the on-campus lab. There are 30 hours of practice lab under the guidance of skilled faculty.

Corequisite(s): Take NUR-631

**NUR-632 Advanced Pharmacology (3 credits)**

This course is designed for graduate nursing students preparing for the role of a Nurse Practitioner and may be taken by other advanced practice nursing students preparing for direct practice roles. This course utilizes a systems approach to the study of normal human physiology and pathologic variations of normal physiology. Pathophysiologic changes and adaptations are examined across the lifespan (neonate to adult) for persons experiencing a wide range of health concerns.

**NUR-633 Advanced Physiology & Pathophysiology (3 credits)**

Designed for the graduate nursing student preparing for family nurse practitioner practice, or the community health nursing advanced clinical track, this course utilizes a systems approach to the study of normal human physiology. Variations of normal physiology are explored in relation to adults and children experiencing a wide range of health concerns.

**NUR-634 Health Promotion-Children & Families (3 credits)**

This course was developed for the family nurse practitioner student preparing to work with children. This course provides the theoretical knowledge necessary to make sound clinical decisions. Advanced level normal growth and development will be presented, along with common variations from health. The role of the nurse practitioner in the health promotion of children within the family system will be stressed. Care of children and families from diverse ethnic backgrounds will be explored. Students must plan to take NUR-638 the following semester.

Prerequisite(s): Take NUR-631 NUR-631L

Corequisite(s): Take NUR-632 NUR-633

**NUR-635 Health Promotion-Women (3 credits)**

This course was developed for the family nurse practitioner student preparing to work with women and the childbearing family. The course provides the theoretical knowledge necessary to make sound clinical decisions when providing primary health care to women and childbearing families. Advanced level normal growth and development will be presented, along with common variations from health. The role of the nurse practitioner in the health promotion of women and pregnant women within the family system will be stressed. Care of women and families from diverse ethnic backgrounds will be explored. Students must plan to take NUR-639 in the following semester.

Prerequisite(s): Take NUR-631 NUR-631L

Corequisite(s): Take NUR-632 NUR-633

**NUR-637 Health Promotion Adults Aging Population (3 credits)**

This course was developed for the Advanced Practice Nursing Student including Nurse Practitioners preparing to work with adults and provides foundational background knowledge to make sound clinical decisions. The role of APRNs in health promotion and treatment of health problems in adults will be stressed. Primary care of adults from a variety of cultural and socioeconomic backgrounds will be explored with special consideration to the needs of aging clients.

Prerequisite(s): Take NUR-631 NUR-631L

Corequisite(s): Take NUR-632 NUR-633

**NUR-638 FNP Practicum in Pediatrics In Pediatrics (3 credits)**

Students will complete 200 hours of guided clinical experiences providing primary health care to pediatric patients. Client assessment and management skills will be stressed. Health promotion of underserved populations through patient education and collaboration with other health professionals will be developed.

Prerequisite(s): Take NUR-631 NUR-631L NUR-632 NUR-633 NUR-634

**NUR-639 FNP Practicum-Women Health Care (3 credits)**

Students will complete 200 hours of guided clinical experiences providing primary health care to women of all ages. The childbearing cycle will be included in this practicum. Client assessment and management skills will be stressed. Health promotion of underserved populations through patient education and collaboration with other health professionals will be developed.

Prerequisite(s): Take NUR-631 NUR-631L NUR-632 NUR-633 NUR-635

**NUR-640 Clinical Practicum in Adult Health I (1 credits)**

Students will complete 60 hours of guided clinical experience with adult patients. Client assessment and management skills will be stressed. Health promotion for all populations will be accomplished through patient education and collaboration with other health professionals.

Prerequisite(s): Take NUR-631 NUR-631L NUR-632 NUR-633 NUR-637

**NUR-641 Clinical Practicum in Adult Health II (4 credits)**

Advanced practice nursing students will complete a minimum of 240 hours of guided clinical experience with adult patients. Client assessment and management skills of patients with increasingly complex disorders will be stressed. Health promotion for all populations will be accomplished through direct care, patient education and collaboration with other health professionals.

Prerequisite(s): Take NUR-631 NUR-631L NUR-632 NUR-633 NUR-637

**NUR-650 Nursing & Organizational Leadership (3 credits)**

Today's climate demands nursing leaders to be flexible, creative and able to empower others. Strategies are drawn from both leadership and management theories. Nurses lead and manage nursing care for a variety of populations. Internal and external communication continues to be one of the most important challenges for healthcare leaders. This course will discuss the changed role of a nurse leader, general administration and management, decision-making, entrepreneurship, cost-effective communication and committed care.

Prerequisite(s): Take NUR-613

**NUR-651 Hlth Policy & Advocacy for Nurse Leaders (3 credits)**

The healthcare environment is changing every day and it is influenced by technological, economic, political, and socio cultural factors locally and globally. Health care in the United States encompasses a wide spectrum, ranging from the highest-quality, most compassionate treatment of those with complex illnesses to poor outcomes for those unable to understand, afford and navigate the complexities of care networks. Nurse leaders have the knowledge and skills to promote health and advance values like social justice through policy processes and advocacy.

Corequisite(s): Take NUR-613

**NUR-652 Population Health & Outcomes (2 credits)**

This course will introduce students to the impact that health systems, political agendas, economic policies, environmental regulations and regulatory mandates have on individual measures of health. Students will use publicly available databases and tools to investigate specific health outcomes such as the leading causes of death, disability and the burden of chronic disease. International travel, global warming, the impact of infectious disease and how immigration policies impact the health of Americans will be determined.

**NUR-654 Continuing FNP Clinical Practicum Pediatrics (1 credits)**

Family nurse practitioner students are expected to complete 200 hours of clinical practice during the NUR-638 pediatric health rotation. Students, who do not complete this clinical practice hour requirement, must register for NUR-654. NUR-654 provides students with the opportunity to maintain clinical site placement and satisfy program clinical hour requirements. This course provides continuing registration and clinical faculty oversight and guidance to achieve the clinical course requirements.

Prerequisite(s): Take NUR-634 NUR-638

**NUR-655 Continuing Practicum Fnp Womens Health Practicum, Women's Health (1 credits)**

Family nurse practitioner students are expected to complete 200 hours of clinical practice during the NUR-639 women's health rotation. Students, who do not complete this clinical practice hour requirement, must register for NUR-655. NUR-655 provides students with the opportunity to maintain clinical site placement and satisfy program clinical hour requirements. This course provides continuing registration and clinical faculty oversight and guidance to achieve the clinical course requirements.

Prerequisite(s): Take NUR-635 NUR-639

**NUR-657 Continuing FNP Clinical Practicum Adult Adult (1 credits)**

Family nurse practitioner students are expected to complete 300 hours of clinical practice during the NUR-640 adult health rotation. Students, who do not complete this clinical practice hour requirement, must register for NUR-657. NUR-657 provides students with the opportunity to maintain clinical site placement and satisfy program clinical hour requirements. This course provides continuing registration and clinical faculty oversight and guidance to achieve the clinical course requirements.

Prerequisite(s): Take NUR-637 NUR-640 and NUR-641

**NUR-658 Pediatric Clinical Bridge (0 credits)**

Family nurse practitioner students must complete 200 hours of clinical practice in pediatrics. This clinical bridge course allows students who have secured a pediatric placement to take advantage of the opportunity to complete clinical hours between traditional semesters. This course has faculty oversight and guidance to achieve the clinical course requirements.

Corequisite(s): Take NUR-634 with a minimum grade of B. Be registered for NUR-638 for spring and have a clinical contract in place.

**NUR-672 Advanced Psychopharmacology (1 credits)**

This course provides the advance practice nurse, including the Psychiatric Mental Health Nurse Practitioner (PMHNP) student with content covering psychopharmacologic therapeutic mechanisms. Content includes all classifications of psychotropic medications as well as some adjuvant medications commonly used for treating some mental disorders. Also included is information on neurotransmission and how disruptions in neurotransmitter systems are related to symptoms associated with mood, anxiety and psychotic disorders. The role of the PMHNP as a provider with prescriptive privileges in the management of psychiatric mental health problems is viewed as concomitant with the provision of other therapies including psychotherapeutic interventions.

**NUR-673 Advanced Psychopathophysiology (1 credits)**

This course provides an in-depth study of the physiology of the brain and pathological processes associated with various mental disorders. Advance practice nurses working in psych-mental health settings will benefit from a broad understanding of neural functioning including structural defects, neurotransmitter dysfunction and associative processes. Evidence-based information on neurogenesis and psychoneuroimmunology including the relationship between these processes and environmental influences are examined as a means of improving outcomes for patients experiencing mental health problems. Additionally, treatment approaches that include combined pharmacologic and non-pharmacologic approaches as well as alternative/complementary approaches are examined.

**NUR-679 Independent Study (0 credits)****NUR-681 Clinical Procedure Adv Nurs Practice (1 credits)**

This elective course prepares the graduate nursing student for clinical practice settings. The volume and complexity of health care environments demand that nurse practitioner students be prepared to perform common procedures conducted in outpatient settings. This lab will provide an opportunity for expert faculty to demonstrate common outpatient procedures and for students to re-demonstrate and practice these techniques. Entry level mastery of procedural skills will enhance student's competence in clinical settings.

Prerequisite(s): Take NUR-631,NUR-631L,NUR-632,NUR-633

**NUR-682 Adv Diag Reasoning Seminar for APRNs (1 credits)**

This elective course provides advanced practice nursing students with an intensive, case-based approach that builds upon the introductory reasoning skills the student acquired in NUR-631 and NUR-631L. The advanced practice role requires students to become skilled in formulating accurate differential diagnoses within narrow time constraints and this course provides an opportunity for supplemental practice. Concepts related to clinical algorithms and evidence based practice will be presented using representative case studies and simulation models. Development of critical thinking skills will enhance clinical decision making for entry level to practice.

Prerequisite(s): Take NUR-631,NUR-631L,NUR-632,NUR-633

**NUR-701 Health Literacy & Population Health Outcomes (3 credits)**

This course explores the epidemiology of health literacy and its influence on the delivery of health care services. Individuals with low health literacy are afflicted with a higher number of chronic diseases, have worse health outcomes and generate higher health care costs when compared with their literate cohorts. Students will be introduced to the social, economic, legal, political and education-based policies that contribute to health literacy problems. Health system barriers encountered by low literate individuals who seek care will be explored. Students will work in groups to develop creative, community based solutions to identified health literacy barriers.

**NUR-702 Evidence Based Practice & IT Healthcare Delivery (4 credits)**

This course examines the use of evidence based practice (EBP) and information technology (IT) in healthcare delivery. Using advanced Internet and database search skills, the student will learn how to critically appraise the literature and apply evidence based findings in a clinical, administrative, research, or educational health care setting.

Corequisite(s): Take NUR-703

**NUR-703 Biostatistics for Advanced Nurse Leaders (2 credits)**

This course prepares the advanced practice-nursing student to apply the tools and methods of biostatistics to clinical practice. Clinical epidemiology and evidence-based medicine applications are an integral component of clinical decision-making about individual patients. Advanced practice nurses need to utilize biostatistics principles to provide best practice outcomes for patients.

Corequisite(s): Take NUR-702

**NUR-704 Community-Based Care of Aging Population (3 credits)**

This course was developed for the advanced practice-nursing student preparing to work with older adults. Traditional assessment and treatment plans are often ineffective in meeting the needs of community dwelling elders. Multiply-complex health, social, personal, economic, spiritual and legal issues, not encountered by younger adults contributes to increased morbidity and mortality for the elderly. Students will work in groups to develop effective community based solutions in cases involving older adults. Future nurse leaders will be integral to the development of interdisciplinary solutions to improve outcomes for older Americans.

**NUR-705 Ethical Topics in Advanced Nursing Practice Seminar (3 credits)**

This course studies the ethical dilemmas encountered in Health Care Professions. There are concerns that challenge the value of being human underscored in end-of-life decisions as well as those that span the bioethical literature. Analysis of a collective ethic of organizations will also be conducted.

**NUR-706 Co-MGT for Medical Disorders for APN's (1 credits)**

This course was developed for advanced practice nursing students preparing to work families, some of whom may be experiencing mental health crises. The course provides the theoretical background necessary to make sound treatment decisions when patients have comorbid acute or chronic health problems. Advanced practice nurses must be prepared to provide access to comprehensive care across the lifespan for persons with co-existing mental and medical illness. Health promotion strategies and evidence-based clinical guidelines will be stressed in order to improve outcomes for persons with dual diagnoses. The role of culture and the influence of socioeconomic status are explored in relation to patients' achieving optimum health outcomes.

Prerequisite(s): Take NUR-631 NUR-631L

Corequisite(s): Take NUR-632 NUR-633

**NUR-707 Foundations of PMH for APRNs I (3 credits)**

This is the first of two courses in the curriculum designed to prepare the Psychiatric Mental Health Nurse Practitioner (PMHNP) student for practice. This course provides the foundation required in order to assess and intervene therapeutically for individuals experiencing mental health problems or disorders across the lifespan. Issues related to treatment, including interpersonal and cognitive-behavioral and psychoanalytic approaches are examined within the context of the present day mental healthcare climate and common environmental stressors. Theoretical and conceptual explanations of most DSM 5 disorders are presented while the importance of balancing the therapeutic relationship with evidence based practice is emphasized. The increased prevalence of comorbid conditions and its implications for treatment are examined and considered as rationale for embracing an integrated model of primary care and behavioral health care.

Prerequisite(s): Take NUR-631 NUR-631L

Corequisite(s): Take NUR-632 NUR-633 NUR-672 NUR-673

**NUR-708 Foundations of PMH for APRNs II (3 credits)**

This is the second of two courses in the curriculum designed to prepare the Psychiatric Mental Health Nurse Practitioner (PMHNP) student for practice. This course is designed to help the PMHNP student develop a deeper understanding of mental health and illness as well as a broader contextual perspective and builds upon knowledge of interpersonal, cognitive-behavioral and psychoanalytic approaches used in Behavioral Health. Additionally, an emphasis on the interrelationship between internal and external factors that influence personality development and personality pathology is presented through an analysis of developmental and psychoanalytic theories. Environmental influences and personality structure are also examined in the context of the development of addictive disorders. A systems perspective is employed in applying principles of family and group therapeutic modalities to selected populations. These may apply to specific age groups or disorders, including but not limited to groups or families of veterans or those dealing with addiction. A lifespan perspective is maintained with the addition of content of child/adolescent and elderly populations.

Prerequisite(s): Take NUR-631 NUR-631L

Corequisite(s): Take NUR-632 NUR-633 NUR-672 NUR-673

**NUR-709 Advance Practice Role for Doctoral Nursing Leaders (3 credits)**

This course will explore a variety of issues that affect advanced practice nursing, with specific content pertinent to family nurse practitioners. The legal and ethical underpinnings of advanced practice will be explored. Students will explore the interaction of social, cultural, political, regulatory and institutional policies that influence practice. New practice roles such as entrepreneurship will be discussed. Identifying leadership opportunities for doctoral students will be stressed.

**NUR-711 Translational Capstone: I Identify Project (2 credits)**

This initial capstone residency experience is designed to provide the student with an intensive immersion opportunity in which they apply their foundational preparation and identify a focus for their capstone project. The student will select a mentor to work with who is an expert in their field of interest and associated with a community site or organization. During the residency, a problem that is amenable to an evidence-based solution will be identified within the clinical site.

Course Types: Capstone

**NUR-712 Translational Capstone II: Design And Pilot Project (2 credits)**

The student will work with a mentor and project chair to design and pilot the translation project in Capstone II. The project committee, which is mutually agreed upon by the student and advisor, will be providing feedback and critique during this process. The project chair and second committee member will be responsible for communicating with the mentor when needed to enhance the design of the project. The student will develop a theoretically and evidence-based program to address the problem identified in Capstone I. The student will be responsible for presenting the proposed design in writing and defending orally to committee members.

Course Types: Capstone

Prerequisite(s): Take NUR-711

**NUR-713 Translational Capstone III Implement and Evaluation (3 credits)**

In Capstone III, the student will work with a mentor to actualize the problem defined in Capstone I and designed in Capstone II. This experience allows the student to translate evidence-based findings into practice, to evaluate program development projects, and to participate in collaborative, inter-professional approaches to health care problems. The student will implement and evaluate a theoretically and evidence-based approach to address the identified problem. The student will be responsible for completing the project, presenting it in writing and defending orally to their committee.

Course Types: Capstone

Prerequisite(s): Take NUR-711 NUR-712

**NUR-714 Clin Practicum in Comm-Based Family Care (2 credits)**

This course was developed to provide an opportunity for advanced practice nursing students to work in a primary health setting with patients across the lifespan. Students will complete 120 hours of guided clinical experience with specific focus on client assessment and management skills. Health promotion will be accomplished through patient education and collaboration with other health professionals.

Prerequisite(s): Take NUR-631 NUR-631L NUR-632 NUR-633 NUR-706

**NUR-715 Psy Mental Health Clinical Practicum I (3 credits)**

This course provides the Psychiatric Mental Nurse Practitioner (PMHNP) student with an opportunity for implementation of skills consistent with the provision of care to individuals experiencing mental health problems, including assessment, diagnosis and therapeutic interventions. Psychotherapy modalities including interpersonal cognitive-behavioral and psychoanalytic approaches are implemented and where appropriate, psychopharmacological treatment is provided based upon assessment data. Students will be required to complete 180 clinical hours during this rotation.

Prerequisite(s): Take NUR-631 NUR-631L NUR-632 NUR-633 NUR-672 NUR-673 NUR-707

**NUR-716 Psy Mental Health Clinical Practicum II (4 credits)**

This course provides the Psychiatric Mental Nurse Practitioner (PMHNP) student with an opportunity for implementation of skills necessary to intervene therapeutically for families and groups. Theoretical application of family and group therapies including interpersonal, cognitive-behavioral and psychoanalytic modalities is emphasized when working with selected populations. Promotion of wellness and interventions for family or group systems experiencing dysfunction are included in the provision care. Students will be required to complete 240 clinical hours during this rotation.

Prerequisite(s): Take NUR-631 NUR-631L NUR-632 NUR-633 NUR-672 NUR-673 NUR-708

**NUR-724 Continuing PMHNP Clinical Practicum I (1.00000 credits)**

Psychiatric Nurse Practitioner students are expected to complete 120 hours of clinical practice during the NUR 714 clinical rotation. Students, who do not complete this clinical practice hour requirement, must register for NUR-724. NUR-724 provides students with the opportunity to maintain clinical site placement and achieve course competencies. This continuation course assures clinical faculty guidance while completing clinical course requirements.

Prerequisite(s): Take NUR-706 NUR-714

**NUR-725 Continuing PMHNP Clinical Practicum II (1.00000 credits)**

Psychiatric Nurse Practitioner students are expected to complete 180 hours of clinical practice during the NUR-715 clinical rotation. Students, who do not complete this clinical practice hour requirement, must register for NUR-725. NUR-725 provides students with the opportunity to maintain clinical site placement and achieve course competencies. This continuation course assures clinical faculty guidance while completing clinical course requirements.

Prerequisite(s): Take NUR-707 NUR-715

**NUR-726 Continuing PMHNP Clinical Practicum III (1.00000 credits)**

Psychiatric Nurse Practitioner students are expected to complete 240 hours of clinical practice during the NUR-716 clinical rotation. Students, who do not complete this clinical practice hour requirement, must register for NUR-726. NUR-726 provides students with the opportunity to maintain clinical site placement and achieve course competencies. This continuation course assures clinical faculty guidance while completing clinical course requirements.

Prerequisite(s): Take NUR-708 NUR-716

**NUR-777 Graduate Nursing Clinical Bridge (0.25 credits)**

Nurse Practitioner students must complete a defined number of clinical practicum hours in identified courses required for their advanced practice degree. This bridge course allows students who have secured a clinical placement to complete clinical hours between traditional semesters. This course has faculty oversight and guidance during the winter session.

Course Types: Teamwork

**NUR-800 Continuing Clinical Practicum Residency (1-3 credits)**

This continuing clinical practicum residency course is designed for the advanced practice nurse who requires additional clinical hours to meet the minimum total of 1000 hours of practice for DNPs. Students who are placed in patient care areas will complete clinical logs to document that experience. The total number of additional hours to be completed will be determined by the DNP program director after assessing all previous transcripts and coursework; the result of this assessment will be communicated in writing to the student. The student works with a clinical faculty member who has the academic preparation and experiential background to oversee this course. The site and setting for this experience will be individualized based on student need.

**NUR-801 Evolution of Forensics (3 credits)**

This is the first of a 4-course sequence and will explore the evolution of forensic science, examine different types of interpersonal violence, mechanisms of injury, patient management and explore legal and ethical issues relating to these times of crimes. The application of forensic science is looked at across the lifespan as well as globally and culturally.

Course Types: Critical Analysis

**NUR-802 Principles and Techniques of Forensic Science (3 credits)**

This is the second course of a 4 course sequence and will explore the many facets of injury infliction as well as the importance of DNA, it's recovery as well as other principles of evidence collection and the use of photography, toxicology, as it relates to a forensic investigation.

Course Types: Critical Analysis

**NUR-803 Patient Injury Management (3 credits)**

This is the third course of a 4 course sequence and will explore the evolution of forensic science, examine different types of interpersonal violence, mechanisms of injury, patient management and explore legal and ethical issues relating to these times of crimes. The application of forensic science is looked at across the lifespan as well as globally and culturally

Course Types: Scientific Reasoning

**NUR-804 Legal Issues/Judicial Process in Forensics (3 credits)**

This is the fourth course of a 4 course sequence and will explore the evolution of forensic science, examine different types of interpersonal violence, mechanisms of injury, patient management and explore legal and ethical issues relating to these times of crimes. The application of forensic science is looked at across the lifespan as well as globally and culturally.

**NUR-900 Continuing Capstone Project Advisement (1-3 credits)**

This continuing advisement course is for DNP students who have identified, designed, piloted and begun to implement their capstone project but require additional time to complete or evaluate the project. Students may experience delays related to organizational or mentor changes and need a mechanism for continuing registration in order to achieve the course outcomes. The student continues to work with a community mentor and under the guidance of his or her capstone chair until the project has concluded.

Course Types: Capstone

Prerequisite(s): Take NUR-711 NUR-712 NUR-713
