

MATHEMATICS B.A.

*Admissions and internal transfers into this program have been paused

This program has fewer required courses in mathematics than the Mathematics B.S., so students have more free credits to explore other disciplines or further expand their mathematical experience. This program is particularly suited for students who wish to teach high school mathematics or to combine mathematics with another concentration. A total of 11 mathematics courses (36 hours) are required, consisting of 8 required courses (27 hours) and 3 electives (9 hours). In addition, two semesters of physics with lab (8 hours) are required

Program Requirements

Students within the department must maintain a minimum 2.0 G.P.A. in coursework required for their major and taken at D'Youville University. Students who fail to earn this G.P.A. will be placed on probation in the major. Probation may continue for a maximum of three consecutive semesters or a total of four non-consecutive semesters. Students who exceed these limits will be dismissed from the major. Students may appeal these decisions on academic status by submitting, in writing to the department chairperson, reasons why exceptional consideration may be justified. Additionally, students must earn a minimum grade of B- in Calculus I (MAT-125) and Calculus II (MAT-126).

The B.A. in Mathematics requires a minimum high school average of 80% and a rank in the top 50% of one's class. Transfer students are required to have a minimum G.P.A. of 2.5.

Students nearly meeting these requirements will be considered for these programs by the department. Students denied immediate acceptance into the Mathematics B.S. will be accepted into the Mathematics B.A. program if they meet its requirements. These students may be promoted into the Mathematics B.S. program after they have sufficiently demonstrated competence (usually after the completion of two semesters).
